

Dear Sir

Ref: The Lime Plastering Co

I am more than happy to offer my endorsement to Pete Seeger trading as the Lime Plastering Company.

I first met Pete five years ago on project where he was asked to do the lime plastering for a contractor and I was suitably impressed from the outset, his level of questioning to me certainly suggested the right attitude with a refreshing approach. That particular project led us to employing him to undertake all the plastering requirements on the building works we were carrying out at the time to our offices, shop and training facility here in Bodmin that happened to involve a reasonable amount of lime work.

We have no hesitation whatsoever in passing on his details to customers as he is a genuinely likeable guy, with a professional attitude and very diligent in our experience.

Whenever we have new products to trial we will ring him up as we have the utmost respect for his opinion and his evaluation of the products being trialled. We are also delighted to hear that he is looking to focus his work when eventually he will be using lime more or less exclusively, and welcome such a move and will try and assist in his endeavours as much as we can.

I trust this has been of some help to you but should you wish to discuss the matter in person please don't hesitate to contact me directly on 01208 79779

Best regards

Phil Brown
